

Structure granulat Coarse

Product properties

Coarse filling agent to be mixed with paint. Structure filler, which provides a rich, coarse, render-like structure and makes it possible to apply a thicker layer of facade paint.

- Render-like structure
- Rich and coarse-grained surface
- Smooths out structure differences

Labelling

Treatment

Add 1 kg Flügger Facade Structure Filler to 10 litres facade paint.

Stir thoroughly by machine, e.g. a beater on a drilling machine, and the mix is ready for use.

Add maximum 2 kg Flügger Facade Structure Filler to 10 litres paint.

In order to obtain a better result, apply the paint by paint brush, flat wall brush, or roll lengthwise, crisscrossed or crosswise, depending on the effect you wish to obtain.

If richly applied, structure differences at wall repairs and the like can be smoothed.

Please also refer to the product data sheet of the applied paint.

BGood practise

Make a test application in order to test different application methods.

Application

For application as structure agent in all facade and priming paints.

Especially suitable for Flügger Facade Silicate and Flügger Facade Impredur.
