

# Filler Interior

## Properties

Type: Gypsum filler. Flügger Filler Interior is a fine-grained filling powder, containing gypsum. Registered in the Nordic Ecolabelling Building Products Database for products which can be used in buildings with the Swan label.

## Use

Suitable interior in dry rooms for repair of cracks and holes in ceilings and walls etc.

Brush away dust and loose particles.

Prepare by mixing 2 vol. parts filler in 1 vol. part water. Stir to uniform consistency.

Apply with filling knife, press the filler well - smooth with moist brush or smoothing board before drying, or sand after drying.

After use all tools should be cleaned with hot water - scraps of old filler will shorten the pot life of the next mixture.

NB: Sanding requires the use of eye protection and dust filter mask.

**Storage:** Cool, frost-free and tightly closed

## Technical Data

Product Type	Plaster & Sealant
Density (kgs/l)	2.63
Min. working temp. during application and drying/curing	Min. +5°C
Cleaning of Tools etc.	Water
